EDUCATION

Independent Studies
deeplearning.ai (Coursera) — Deep Learning Specialization 1-4   *June 2019 - August 2019*
Stanford Online (Coursera) — Machine Learning   *January 2019*

Taylor's University   *August 2018 - August 2021*
Bachelor of Software Engineering
Data Science Specialization
Overall GPA: 3.2

EXPERIENCE

Skymind Deep Learning with Computer Vision   June 2020
· 2-week intensive training programme, including post-training examination
· Built and presented an image classification system as part of capstone project

TECHNICAL PROJECTS

pathfinder   July 2020
· Search algorithm visualizer, built using React
· Supports breadth first search, greedy search, and A* search

bird-classfier   June 2020
· Deep learning training program capstone project
· Built an image classification system capable of classifying 200 species of birds
· Worked remotely within a team of 3 people to coordinate and build our project

neural-net-trainer   March 2020
· Implemented a vanilla neural network in JavaScript from scratch
· Built frontend and backend using Express and React

nand2tetris-js   March 2020
· Implemented a simple general purpose computer in JavaScript from scratch
· Learned to read and write basic assembly programs

SKILLS

Computer Languages	Python, JavaScript, Java, R, C++
Machine Learning	Fastai, Keras, DL4J, scikit-learn
Web Development	React, Redux, Nodejs, Express, MongoDB, Postman
General	Git, Bash
Human Languages	English and Mandarin (Chinese)
